TYPES OF ROCKETS HELD BY HAMAS

- Fajr-3 artillery Iranian-made rocket**
Manufactured since 1991 with North Korean assistance.
- 60 to 90mm self-produced mortar shell**
- Improved Iranian 107-122mm rocket**
Range: up to 24.8 mi.
- Iranian 168mm rocket**
Range: up to 12.4 mi.
- 120mm standard Iranian-made mortars**
- Konkurs (AT-5) • Sagger (AT-3) • Fagot (AT-4 Spigot)**
Advanced Russian-made anti-tank systems designed to destroy armored vehicles. Laser/wire guided, the warhead is capable of penetrating reactive armor. Often lightweight and compact, giving anti-tank teams more flexibility, mobility, and better chances of hitting the target.
